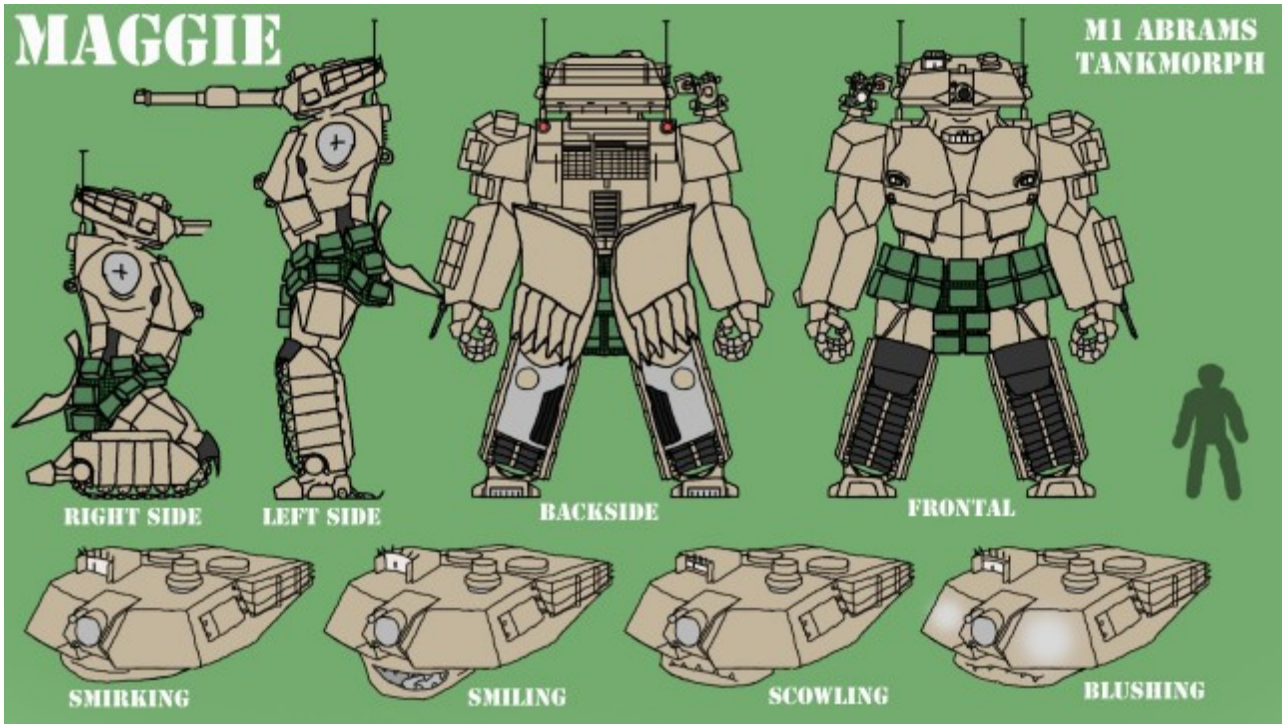
5th trimester finals are coming and I Thought it was time to make a new post about happenings in the world. School has been alright as well as clinicals, cant really complain. Titanatelier domain payed off for another year thanks to the folks over at

Patreon, and helpful donations from a fan (krill) thank you! S'far as my art goals are concerned, I originally meant to have page 30 of Atoll Lab knocked out by the end of December but things didn't work out that way. My current art schedule as follows:

1. Dire machine study
2. Delta pic
3. January art cards.
4. (vehicle expression style sheet)

After I get this month complete Ill be working on the comic almost exclusively in March and hopefully I'll actually make some progress in the damn thing. Speaking of art..

Humble Titan fan Iron has been up to some good shit including his own take on a female tankmorph for the Abrams MBT :



I wanted to do this shout out because this morph follows the kind of design philosophy I can get behind. While yes, some features may have been inspired off of previous sketches, I think the attention to the overall theme of the American mbt in its design is a real strong point here (just check out the reactive armor skirt). We swim in a sea of similar "morph" arts where virtually no attention is payed to creature design but to favor sex appeal. And I had mentioned to someone earlier that I ught that humanoid ground units would look pretty much very Robot-like at first glance due to all the panels, antennae, guns, armor, and gears.

Iron does a lot of artwork though, mostly focusing on large complex siege engines and very Warhammer 40k inspired machinery. you can find his artworks over on **DA**. He has also written A fallout-esque/Mad Max-esque post apocalyptic mechaphillia story that I think is totally worth reading. If you like it, please leave a comment about it and I'll pass it on to Iron. Open with text edit—-> https://titanatelier.com//wp-content/uploads/2016/01/The-Last-of-the-Fusiliers.docx

Incidentally I started a new game, Divinity: Original sin. This game is akin to one of those old black Isles top down D&D rpgs and I'll have more of a review once its finished, but so far its pretty damn good. As for AW, Ive got my 2nd tier 9 mbt the Leopard IIA6 and the 3rd dealer will be dropping next month. Game is really starting hape up in my humble opinion. Also, Shroud of The Avatar is approaching its ...al wipe before the game goes live. If anyone plays , there are 5 or 6 months left till

account changes are set in stone so get in there and play to your hearts content till the end.

If you would like links to the content she has made private I will attempt to get into contact with her to see if that's permissible, but at this time. The story menu has been updated.

Hey, Ratbat, I attended your stream a while back and I've been followin your stuff for a while, and when I saw the music you posted with the Eagle's Nest post, I just had to share this track. I found it a long, longass time ago, but it's still the most erotic song I've ever heard about an automobile, uh, and maybe the only one.

Lazerhawk is an awesome 80s synth/Blood Dragoney artist and the rest of their stuff is pretty good, but it felt like this was the most relevant of the album.
I hope you enjoy! Your art is really good and often way sweeter and more personable than a lot of smut that tends to be super forceful and cringey.

A second teir 9? You must have every other vehicle by this point too. I've only just unlocked the M1A1yesterday, which I absolutely love, and should have my goal of the M1A2 by some time this week. Perhaps you and I could squad up some time, getting a bit boring

playing alone.

I could have a 3rd tier 9 right now if I want, but I'm waiting on the tier 10 tanks. 3rd dealer drops in 11 days too.
